
title: "CST–JPP: Catholic Social Teaching and Judgment Premised Processing" document: README — Canonical Initial Statement document_version: 2.2 canonical_trunk: JPP 1.3b (frozen) updated: 2026-09-21 author: Dominic G. Flamiano, OP, JD

CST–JPP

Catholic Social Teaching + Judgment Premised Processing

A two-part instrument for judgment under pressure. CST supplies the perception — what kind of moment this is. JPP supplies the steering — what to do inside it.

CST:JPP is a discipline for human judgment, not a substitute for it.

1. The Problem: Drift, Confusion, Opacity

Modern life accelerates faster than inherited judgment systems can metabolize. The symptoms are everywhere:

- **Drift** — losing orientation in the noise
- **Confusion** — collapsing under competing values and narratives
- **Opacity** — lacking a way to see what matters and what to do next

These are structural conditions, not personal failures. When the world becomes chaotic, the operator needs better instruments — not more willpower or slogans. What is missing is a shared grammar for making sense of moments and a disciplined method for acting inside them.

The CST–JPP interface provides both.

2. CST 2026: An Operator's Manual for Moments

CST is not a library of principles. It is an operator's manual for moments — a way of reading the world that preserves dignity, agency, and responsibility under pressure.

God is the initial starting point and the hoped-for end in beatitude. The first stance is the **Universal Destination of Goods (UDG)**: does the act exploit, exclude, and extract — or does it provide for goods to be spread in common? Is it Babel, or the walls of Jerusalem communally rebuilt?

CST 2026 reframes the tradition as a moment-diagnostic system built on four perennial questions:

- What human dignity is at stake
- What solidarity obligations are activated
- What structures of justice shape the field
- What common good must be protected or restored

These are axes of perception. CST gives the operator **moral altitude** — clarity about what kind of moment they are in.

3. JPP: Steering in a Chaotic World

Judgment Premised Processing (JPP) is the steering mechanism — a kata for disciplined action when the world is loud and ambiguous.

Where CST clarifies **what matters**, JPP clarifies **what to do**.

JPP provides:

- **Orientation** — naming the moment and its forces
- **Stability** — preventing drift and distortion
- **Pace** — matching tempo without being swallowed by it
- **Agency** — keeping the human operator at the moral center

Together, CST and JPP form a two-part instrument:

- **CST**: See the moment
- **JPP**: Steer the moment

4. The Architecture: How the System Holds Under Load

4a. Con + Facere: The Shared Act of Making

Con + facere names the disciplined collaboration between human agents, communities, and the systems yoked to them. It is the antidote to isolation and reactive fragmentation.

4b. The Yoke and Harness

The yoke does not spin, decide, or overpower. It constrains tilt, prevents drift, and keeps the operator centered. It is a stabilizer, not a source of agency.

4c. Horizontal Stabilizers: The Cardinal Virtues

Prudence, Justice, Fortitude, Temperance — the plane that prevents roll into excess or collapse.

4d. Vertical Stabilizers: Faith, Hope, Love

The keel and direction. They prevent yaw — twisting away from the true course.

4e. The Moment of Witness

Where judgment becomes testimony. Where the architecture proves itself in lived reality.

Canonical Closure

CST–JPP restores clarity, agency, responsibility, and the ability to act without distortion. It is a manual for operating inside moments — **not a system for judging people**.

5. What Is In This Repository

Item	Status
012626_JPP_1.3b_Under Pressure.pdf	Canonical frozen trunk (JPP 1.3b). Governs.
00–08 numbered Markdown modules	Teaching modules derived from the trunk.
CST-JPP-Manual1.md	Combined reading copy of the modules.
07_Buddhist-March-on-Petersburg.md	Case study.
docs/meta-application/	Commentary. Not canonical.
Other PDFs (Grammar of Agency , Glossary , Bibliography , case studies)	Working and archival material. Not canonical.

Where the trunk and a module differ, the trunk governs.

Version identity

Two numbering systems run in this repository, and they are not the same thing:

- **JPP 1.3b** — the version of *the work*. Frozen. This is the number used in attribution.
 - **Document version 2.2** — the version of *this README* as a document. It will advance for editorial corrections without implying any change to the trunk.
-

6. Provenance

This repository is the public location of the canonical artifact. Integrity is established by hash, not by commit history.

Canonical artifact: 012626 JPP 1.3b Under Pressure.pdf **SHA-256:**
d05d72520025ad9eed2286b5bf9f17165f4bd132f9f000ed32650d3b45329905 **Size:**
4,010,120 bytes

Verify a copy:

```
shasum -a 256 "012626 JPP 1.3b Under Pressure.pdf"
```

A copy that does not produce this digest is not JPP 1.3b, whatever it is called.

Canonical homepage: <https://github.com/DomFlamLaw/Judgment-Premised-Processing>

7. License and Use

Two tiers. The trunk is frozen; branches are permitted but must say how they diverge.

Tier 1 — Canonical Trunk (JPP 1.3b)

Licensed **CC BY-NC-ND 4.0**.

- **May:** read, teach, and practice as-is, in noncommercial settings, with attribution.
- **May not:** modify, rename, reorder, or restructure and still call the result JPP 1.3b.
- Rationale: the trunk protects lineage and prevents distortion.

Tier 2 — Sanctioned Branches (CST:JPP-X)

Licensed **CC BY-NC-SA 4.0**.

- **May:** adapt, extend, and apply to new domains.
- **Must:** attribute the trunk, **disclose divergence from JPP 1.3b in writing**, and remain open under the same terms. Branches may not be enclosed.
- Rationale: share-alike honors the universal destination of goods.

Automation Prohibition (both tiers)

JPP may **not** be embedded as a decision component in automated or AI systems without explicit written license and human-in-the-loop safeguards. Module 03 describes the cardinal-virtue matrix as *legible* to machine evaluation; legibility for diagnostic and formation purposes is permitted. Delegation of the judgment itself is not.

Attribution (short form)

Used with permission from **CST:JPP 1.3b** (Dominic G. Flamiano, OP, JD).

License files: [LICENSE](#) (trunk) and [LICENSE-BRANCHES](#) (branches).

8. Redline Misuses

- No **Act Vector** without **Orient and Align**.
 - No use of **altitude** to bypass accountable stakeholders.
 - No reordering or renaming of phases in any work claiming to be JPP.
 - No **JPP-compliant** claims for AI-only or automated workflows.
 - No training of others unless operator readiness is met.
-

9. Operator Readiness Checklist

All five must be **yes**:

1. Completed **three live cycles** — adversarial, time-compressed, and multi-party — each with a debrief.
2. Can resolve a **virtue conflict** (e.g. Prudence against Justice) before acting.
3. Has demonstrated **Wu-Wei timing** — disciplined non-action — at least once.
4. Agrees to attribution and to the no-derivatives condition on the trunk.

5. Files brief debriefs: what JPP **prevented**, what it **enabled**, and where it **strained**.
-

10. Stewardship Notice

Proper use presumes formation in ethics, authority, and consequence. Misapplication — especially as a control device, a speed hack, or a proxy for conscience — is outside scope and contrary to design.

CST:JPP is a discipline for human judgment. It is **not** legal, medical, or administrative advice. Users remain responsible for their own decisions and outcomes.

11. Changelog

- **JPP 1.3b — frozen trunk.** Canonical release. No structural changes anticipated. Sanctioned variants, if any, will be branch-labeled (e.g. **1.3b-RC** rapid-cycle, **1.3b-T** team/communal).
 - **README 2.2 — 2026-09-21.** Editorial: license resolved into two tiers with files; SHA-256 published; terminology fixed to *Judgment Premised Processing* throughout; version identity separated from document version. No change to the trunk.
-
